11:00am to 11:45am CDT	<b>2026 - Tribal Technology &amp; Infrastructure Readiness</b> Do you know what technology and infrastructure is most important to tribes in 2026? This session time will give each attendee dedicated time to review and complete the nationwide Tribal Technology & Infrastructure Readiness Survey which aims to benchmark the current state of technology across Indian Country. The results of this data can help your tribe (and every tribe) better advocate for greater resource allocation and infrastructure support. Results will only be shared in a de-identified, aggregate format with survey participants and Regional Event attendees. Preliminary nationwide and regional results will be shared in tomorrow's 10:30 session - so plan to be here to become among the first to see these results - just by being at this regional forum.
